Whether you're a teacher correcting exams.
A student cramming for them. A housewife
cleaning up after the kids. Or a businessman working
late at night. Whoever you are, things go better
when you pause and refresh with ice-cold Coca-Cola.

THE LONG WALK . . .

back to good health after a serious illness or accident is a partnership, involving the patient, the doctor and the hospital. For over 60 million Americans — including a million Tar Heels — this partnership is strengthened by the presence of Blue Cross and Blue Shield protection. These plans pay doctors and hospitals for the **individual needs** of the patient. And they pay direct to the provider of the service.

Blue Cross for hospital bills, Blue Shield for doctor bills: These are plans you can confidently recommend to your patients. You will be doing them a financial favor.

Committees & Organizations

Schedule of Committee and Commission Appointments, 1963-1964

NOTE: The Committees listed herein have been authorized by President John S. Rhodes, and/or are required under the Constitution and By-Laws.

Particular note should be taken of the authorization of the House of Delegates of a Commission form of organizational activity and that all Committees, excepting Committee on Nomination, Committee on Negotiation, and Committee on Grievances, are segregated under the respective Commission in which the function of the committee logically rests. This will tend to eliminate overlapping and duplication in activity programs and result in coordination of the work of the Society in a manner to lessen the work of the delegates in the Annual Meeting of the House of Delegates

(The President, Secretary and Executive Director of the Society are ex-officio members of all Committees and, along with the Commission Chairman, should receive notice of meetings, agenda and minutes of committee meetings during the activity year.)

COUNCILORS DISTRICTS

Constitution and By-Laws of the Medical Society
of the State of North Carolina

Article VI Section and District Societies

The House of Delegates may provide for a division on the scientific work of the Society into appropriate sections, and for the organization of such councilor district societies as will promote the best interests of the profession, such societies to be composed exclusively of members of component county societies.

Chapter VII—Councilor Districts

when something was missing...

... they turned to milk. In 1881 Lunin showed that mice died when fed a diet consisting of carbohydrate, protein, fat and minerals. Fresh milk saved their lives... and the existence of what we now call vitamins was demonstrated.

Historically, milk has been one of the first choices of scientists when they needed a likely source of missing nutrients. And milk has usually filled the need... at one time because it contained vitamin A... at another, vitamin D... and, at others, B vitamins or protein.

Today, dairy products continue to be an im-

portant source of many nutrients. When consumed as part of an adequate diet, they provide:

- ... $\frac{2}{3}$ of the calcium
- ... $\frac{1}{2}$ of the riboflavin
- ... $\frac{1}{4}$ of the protein

... required by adults... plus significant amounts of vitamins A, D and the B complex. In weight control diets low calorie dairy foods are unsurpassed as sources of essential nutrients.

As they have in the past, milk and other dairy foods will continue to play a vital role in the nutritional welfare of our people.

The nutritional statements made in this advertisement have been reviewed by the Council on Foods and Nutrition of the American Medical Association and found consistent with current authoritative medical opinion.
